The order of the Templars

"Not us, oh Lord, not us, but your name is honor." Motto of the Templar order

In 1117 a circle of a total of nine knights decided, among them Toning Hugo de Payens and Geoffroy de Saint-Omer, a community for Protection of Christian pilgrims in Palestine. A little later they were allowed to do their quarters move to the site of the former Jerusalem temple, which means that they are now Knights were known. In the ruins of this temple they soon made one Astonishing find old Hebrew writings that were forwarded to Etienne Harding. The Content was shocking for the knights: it was fragments of the writings of some Spies that on behalf of the Synedrium of Jerusalem about "the cursed son of a bitch Jesus "and his" blasphemy against the God of Israel "reported.

The Templars had to realize that the official teachings of the church could not be right. Yahweh was not the god and father of Christ, but was from exposed to him as Satan.

The knight's group kept the secret to itself and in 1128 found under the patronage of the Bernhard von Clairvaux the formal foundation of the order. The search for the Truth continued. In the event of a push against Damascus, the templers fell letters from Ali ibn Abu Thalib into the hands, which of a falsification of both the Koran and the Evangelia Christi Languages. The knights then arrived from the circles of the Katharers Fragments of the original Johannes Gospel. Leaded by these findings, they changed Templar their simple cross in the red thorn cross - the symbol of the Marcioniter. The Ritter Roderich and Emmerant soon went on the footsteps of Marcions for more Evidence of evidence. In March of 1235 she led her search to the area of the former Carthage. Considering a shelter, they discovered one Huge grotto in which they opened their camp. There they noticed a shimmering and luminous female figure that can be recognized as a big gel iStara, botin of God gave. Like God his lightest angel Istara already to the Babylonians and Carthaginians the Templars had now also sent a revelation and an order: the Creation of a new light rich in earth, in German -speaking countries with two Haupt cities. Vienna in the south and a second in the north that are still founded should. In addition to this information, the Großel also showed the knights where they were the old ones Writings of the Carthage and Marcioniter including their made by Marcion Could find translations. The Templars were looking for the place where the new place loudly Istara was to be created, and founded her hidden Tempelhof - later Berlin. There Istara appeared again in 1238 and brought further instructions. The name of the district is still reminiscent of the knowledge of the Templar order at the order Was still for Babylonian by trading with the assassin leader Hasan Ibn Sabbah Text fragments and their Persian and Arabian retention. The knights were now well equipped: with the Babylonian and Carthaginian fragments of the Ilule teaching they had the basics of early Christian teaching in their hands - the old one, so to speak, Testament as it should have been. In addition, the power of the Templars in the West grew constantly on and they now had a clear order: the preparation of the "empire Novum ", the new light rich on earth.

The fact that they could not realize it, but only lay the foundation stone Istara already communicated, because the final victory should only be achieved after centuries become.

Some readers may now wonder what the non -German temple knights - and That was the vast majority - for an interest in a light in German

Could have soil.

To do this, you have to put yourself in the world of thought of that time. The Order members, and the majority of the West, were primarily seen as Christians and not as members of a certain people. It was important for them that a New light and not where. In general, it was not as in their writings "German Empire", but called a new "Babilu".

The gentlemen of the Black Stone of the Templar Order was never in his history uniform construct, but clearly characterized by sectionism. Was in common only the rejection of the Old Testament and the Church, the Yahweh as Father Christi looked at. One of the most interesting of these Templar departments was the gentlemen from Black stone, founded by Hubertus Koch in Upper Austrian - even if his team probably more tolerated than was really recognized. The probably born in the Orient Knight lingered in the ruins of an old Assyrian city as a female other side Eating of Isais appeared. (Even if this is strongly related to the events previously described In order to remind the knights Emmerant and Roderich, Isais and Istara are not identical.) This Isais gave Koch to see the "Berg of the Old God", in which Hubertus immediately recognized the Untersberg in Berchtesgaden. He reached with one via Alexandria and Pisa small crowd the mountain in the spring of 1226 and built a one at its foot, on the Ettenberg Small quarters. In the following ten years, Isais appeared to the knights several times and delivered important information and three magical objects to the crowd. Spear tip, a mirror and the most important gift a magical octahedron Stone named Ilua. "She brought us, the Isais, the Holde, as a precious gift, which none Human ever; A magical stone, quite artistically sanded, of black and Lilanem shine. "Isai's gift, i.e. after this stone the Knight's Char Names "The Lords of the Black Stone" (DHVSS). All objects were safely in the Untersberg hidden. Koch's group maintained close connections to Graf Hugo von Previous, large commodity of the southern Germany/ northern Italy area and head of the Secret Templar Section (Signum Secretum Templi). Isais with the Ilua Demendation of the figure from the 13th century by Dr. Reiterich (1916)

The Untersberg secret hide of the gentlemen from the Black Stone

The two stones we already saw that the creation of a new light rich on earth was one of the most important goals of the Templar order and especially with the Secret scientific section Graf Hugos. While Istara and Isais already apply God brought the message that this realm emerges from German lands If, the Templars also found an indication of it in the Gospels, so you read yourself in the falsified writings of the Bible: "That's why I tell you [the Jews]: The Reich God will be taken by you and given a people that his fruits brings. "Mt 21, 43 Which people are meant but goes from the original Mattheus Gospel note: "These are there, of whose fruitful people I spoke and that I spoke mine. And Christ, the Lord, raised his arm and stood silent towards a small group listening legionaries, which were from the people of the Germanic. "

So how should the creation of the new light rich be done? By means of two magical stones. As we saw in part 1, everything is based on the male and female Ilu staff. It was therefore a stone that in itself the female vibration power, as well as a stone with male vibration power. Due to their connection, that should Divine light from the magical sun (Ilum) are pulled to earth. The first Stone: The black violet ilua, delivered by Isais. It harbors the female light power. Second stone: The crystal -like Garil, from the legacy of Nebukadnezzar. He harbors the male light force. On this second stone the rumor also goes back that the

Templars were owned by the grail. According to the small order book, this comes from that the tradition to the magical stone all wrote down in Arabic were, without vowels, and thus instead of Garil the word GRL stood from which then Grail became.

The order book also provides information that this stone is actually in the chalice was kept with which Christ did the last sacrament.

Baphomet

In addition to the rumors around the grail A devilish head called Baphomet. What it really is all about However, you can already see from the word yourself. The original shape is accadaic/ Babylonian and means "Bab-Come", which means about "gateway to the light beam". Through Translations from the Akkadische/ Babylonian to Old Persian, from there to Arabic, Then into Greek and finally to Latin it became "bakome" and ultimately deformed to "Baphomet".

The word actually describes the invisible magical sun (ilum), also blacks Sun, the source of the divine forces in this side. To attract this force used special figures. They show a male/female double head that from the braid of the female part. It symbolizes the eternal male and female Ilu forces who become an all-round power in their association. When the Templars first one The magical stones could already call their own, they already provided small baphomet figures here; After obtaining the second stone, however, they were in possession of both forces, Male and female, and were able to tackle a very special project:

The creation of the Magna figura, the large baphomet.

The idea of creating this figure is likely to go to Hubertus Koch Back and was implemented by Hugo von Weitenegg. The project was carried out by the secret scientific section, not from Templar order as a whole. The Magna Figura Baphomet was a magical apparatus of which Function for the knights was not in the time, but in the distant future. If the Time was ripe, the two magical stones could be put together so that the figure made vibration affinity for the magical sun.

Without the wooden base, the figure 1.25 m measured and was probably completely made of gold manufactured. The eight -canted base under the figure was decorated with numerous gemstones And provided with a drawer in which the Garil should be inserted. On the crown The double head was a hole in which the Ilua had space. "In the Heil'gen Grotto stands high on the pedestal, the Figura Baphomet, is waiting for the high festival, which Bring her strength over our earth, which creates the new power so that it becomes light. " The large Baphomet was mainly in Vienna or the surrounding area. Where it remained unclear after the custody of the Templar order. the possibility is taken to Tempelhof (Berlin).

The end of the Templars

Adoration of a main, converted pentagrams, devil heads, ... the rumors about the Templar slowly took over. What it really is all about know only that at least. The pentagrams: symbolized the rejection of the pentateuch, the five books Cunt. The devil's heads: symbolized the church, which viewed the fallen angel of Jahweschaddai as God and Father of Christ. Eliphas Levy took her as a model for his False baphomet representation In addition, the Templars "have the holiest of the

Church to be revealed ".

But that was not the cross, but the Bible - because this book, with the Writings of the Old Testament, they truly rejected. The secrets of the order could Do not stay hidden forever and so soon the heresy and idol was being bought at last laid. King Philipp's IV. In the other countries, the order soon became too Shattered, even if many members of the order go to safety in good time Jacob of Molay, the last grand master of the order, was on the Burned pile. When storming the last Viennese refuge, the blood of the fallen the fall of the temple colored the street red. Even today you can find in the Capital of Austria the "Blutgasse". Even if numerous new "Templar Order" The descendants of the old knights of temple claim, so it never has one legitimate successor organization. In addition, today's trend, connections to move to Freemasonry, or even to name the Templars as their founders absurd. Not to be forgotten, however, that the secret scientific section fully was geared towards the construction of the light rich in the new age. To last to last to ensure old knowledge and to be active again in the distant future Some of the escaped Templars of a bloodline and community of heirs.

The Ordo Bucintoro

Around 1510, Emmerich d'Anttile and Antonia Contanta founded in connection with German and Venetian merchants the Ordo Bucintoro. Emmerich was a member of The community of heirs of the Temple Knights and was able to inspire Antonia for the old ideas. The order moved into quarters on the island of Murano, which belonged to the Republic of Venice. In 1515 Julietta da Montefeltro took over the management of the order. A little later one founded Further branches in Vienna and Dessau and slowly began over Europe to spread. Equipped with the knowledge of the Templars, the Ordo Bucintoro also saw Primary goal in the creation of the Empire Novum, the new empire. While the Templars rather thought of a Franco-German state with democratic elements, The Ordo primarily strived for an aristocratic core country from all Germans and Italian areas. However, aristocracy should be re -formed. The normal Citizens were granted personal fundamental rights. "The new Eon can just exist And thrive under the screen of the Novum empire. The German-Roman Empire is to look out for that it will be resurrected. "Julietta da Montefeltro of the Bucintoro Already in mind that the new emperor once emerged from a hidden blood line should. A letter was sent to the German Emperor Rudolph II (1578-1637), which was very interested in a secret scientific topic. In the document, his Meaning for the realization of a new age, as well as the information given that in the near future a divine send botin will give him further instructions become. This actually appeared to him.

"The nameless visitor has appeared from this light, how tenderly forming from it, And happened as announced in the second letter. Everything happened! Has the emperor and King special duties, far beyond all others who are now directed into a Only later time, far enough, that no single human life is enough, you too Strip through the inheritance of the blood, it is probably true. " Rudolph II, memorandum to the nameless at the beginning of the 20th century dived in Prague A draft of an unofficial additional testament of Rudolph II. Emperor actually an illegitimate son with a woman who is blood off Roman Emperor Octavianus Augustus and in all likelihood also priestess of the Ordo Bucintoro. The existence of a hidden German-Roman bloodline So it seems to be secured.

Rudolph II.

In addition to the founding of a new Empire, the order was primarily a new one Economic system with interest ban and the destruction of the church planned. Details about the To date, mysterious medals have hardly become known. Loses its trail in the dark. He is said to have been active until the 18th century.

The All German Society for Metaphysics (VRIL Society)

The flag of the VRIL company Schwarz: the dark age Violet: The new age
lightning: the transition with the help of Ilu-Kraft

In 1917 the Viennese Maria Orschitsch, Karl Haushofer, Rudolf von met Sebottendorf and Lothar Weiz in a Viennese café. In 1919 the Thulegelleschaft emerged in 1919, which originally also devoted themselves to esoteric topics, but quickly became a purely political community. For Maria Orschitsch, this gave the impetus In 1921, her friend trusted her to found a new association in Munich: the all German Society for Metaphysics, which initially only belonged to women. Like the Ordo Bucintoro in front of them arrived the new community via contacts with the Templar heirs The old texts and ideas. Internally, the group also called itself a VRIL company. Nowadays, the word "Vril" is mostly claimed to go to the novel of the same name of the British Edward Bulwer-Lytton back, which is wrong. The term was originally "Vri-il" and was only shortened to "Vril" later. As with "Grail" and "Baphomet", the Puzzles solution again in the Babylonian language. "VRI" means in the accada/ Babylonian "equal", "Il", on the other hand, is "the deity" - "Vril" means roughly "God -like".

The members under the VRIL power understood the gods who one benefits thought. "The new age comes when the general vibration is prepared. That means: We have to work on it! "Maria Orschitsch

In contrast to Templern and the Ordo Bucintoro, however, the VRIL company was not purely mentally aligned, but tried special devices and new drive types develop. Among other things, an "afterlife flight machine" was planned. Already in 1922 got The ladies to realize their goals on board several scientists. Four years Later, they were named "Drive Technical Workshops". The official The company was founded in 1934. This step was able to all esoteric groups through the National Socialist leadership in 1941 escape. The work of the VRIL company was put under the strictest confidentiality, So that we can no longer make any statements about your success. During the War was the main project in the development of round aircraft, which can be used today as "UFO" would describe. The company received significant support from Admiral Canaris. What after 1945 from the members of the former All German Society for Metaphysics was not known.

The new kingdom after reading the texts presented here may be one or the other reader The idea of a new large -empire in German lands certainly skeptically to negative opposite. Such reservations against a new world power are certainly understandable. senseless wars of the world police USA. However, these concerns are superfluous.

"Imperium Novum", which Templer, Ordo-Bucintoro and the Vril Society sought, can only be a new light. The election of the Germans to complete this In addition, project does not mean that they are "something better", it does not mean that they had the right to suppress other peoples or similar absurd ideas - entirely On the contrary, the light is also there for the other peoples. Anyway the Ilu teaching a thoroughly positive religion of love and forgiveness in which the Darkness has no place. Arbitrary wars of attack, torture, witch burns and Something similar are not to be reconciled with this teaching. We also hear that from iStaras Word: "Because where struggle may be necessary, the deity will be with the weapons of that Being a new Light Empire and the victory over so numerous enemies forced. But the deity can only borrow the forces and forces, but could not, themselves If she wanted to lead the weapons of darkness, which is why the upcoming new light-empire, which is attached by the divine brother, solely in the light of truth May be taken. "1. Roderich report 4.18-20

The lucky burden of truth to make victory seems to help itself People already showed (subconsciously): Germany led in the big wars The cross while other countries chose circles or stars. On the belts of the Soldiers could be read in both world wars "God with us". The Bundeswehr logo still shows the knight's cross today, which with the Dornenkreuz the Marcioniter identical is.
